

FRANCHAIN REQUIREMENTS

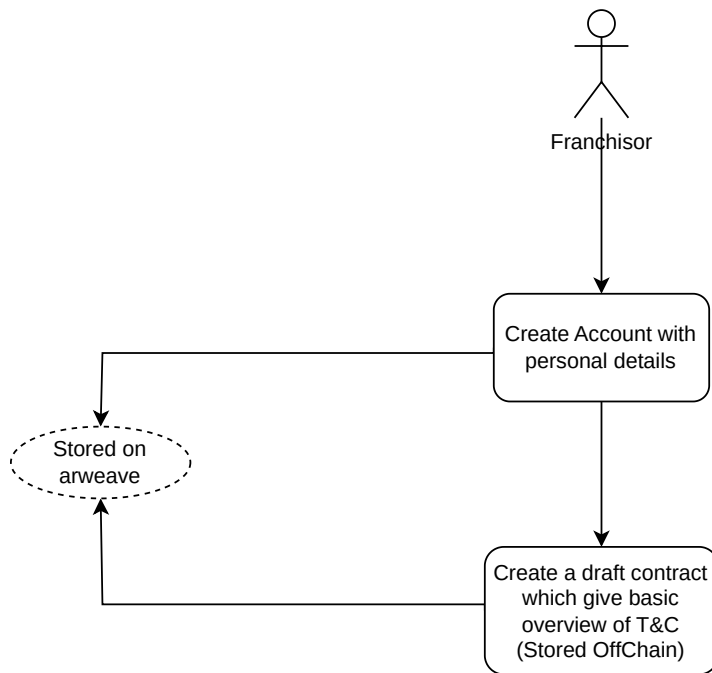

- The platform shall allow a franchisor to create a draft contract with terms and conditions off-chain
- The platform shall allow both parties to edit and finalize a smart contract off-chain before deployment
- The platform shall allow either party to initiate a multi-signature transaction to store the contract on-chain
- The platform shall require both the franchisor and franchisee to sign the transaction before the contract is deployed
- The platform shall store the finalized contract on-chain for transparency and enforcement.
- The platform shall allow **automatic revenue-sharing** based on the terms set in the contract.
- The platform shall require **multi-sign approval** for any amendments or updates to the contract

Overview

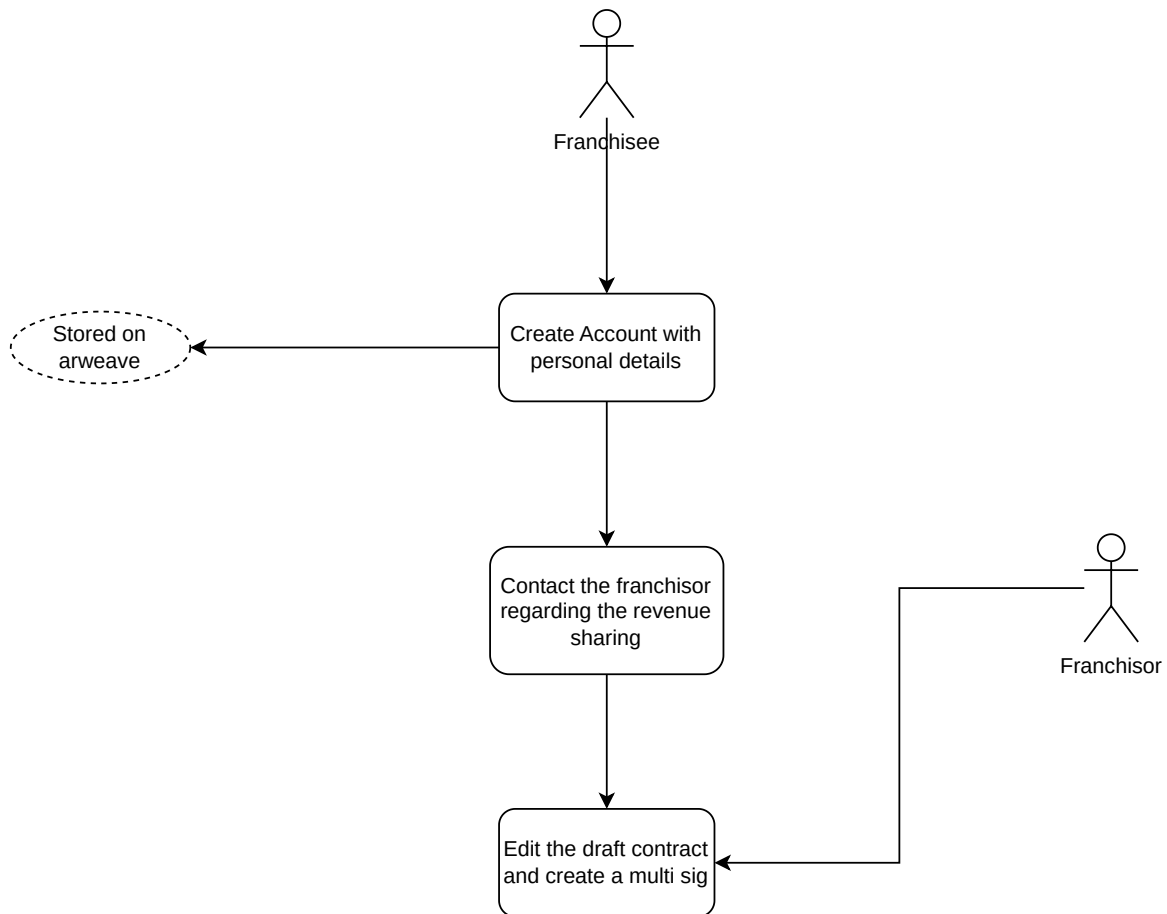

- Franchisor create draft contract
 1. Create a default contract
 2. Submit it and get stored off chain
- Franchisee contact and edit the draft
 1. Contact the franchisor using email/mobile
 2. Edit the draft contract
 3. Create a multi sig
- Multisig get signed by both parties
 1. Both Parties sign the contract
 2. The contract then get stored onchain
