

FRANCHAIN

Revolutionizing franchise
agreements and payments
with blockchain.

Problem Statement

The Challenges in Traditional Franchise Agreements

- Lack of Transparency
- Trust Issues
- Delayed Payments
- High Administrative Costs

Solution Overview

Franchise is a smart contract-based platform that automates franchise agreements and payments, ensuring transparency, trust, and efficiency.

- On-Chain Franchise Agreements
- Automated Payments
- Trustless & Transparent

How it works

1. Agreement Creation

The franchisor and franchisee create a digital franchise agreement stored on-chain.

2. Automated Payment System

Monthly royalties are automatically deducted from franchisee revenue and distributed to the franchisor via smart contracts.

3. Dispute-Free Transactions

The agreement terms are enforced programmatically, reducing conflicts and ensuring compliance.

Business Model

How Franchise Generates Revenue :

- **Transaction Fees** : A small percentage per royalty payment processed.
- **Subscription Model** : Premium features for large franchise chains.
- **Custom Smart Contract Deployments** : White-label solutions for enterprise clients.

Roadmap

Q1 2025: MVP launch & initial testing

Q2 2025: partnerships with early adopters

Q3 2025: Expansion to large franchise chains

Q4 2025: Launch of enterprise-grade features &
scaling to multiple industries
